Atenção! É necessário instalar o aplicativo [Servidor CPrint v2.9.9](#)

<b>Nome/Descrição</b>	<b>Impressora</b> <small>NOME DO COMPARTILHAMENTO</small>	<b>Servidor CPrint</b> <small>(Cadastrar)</small>
ETIQUETADORA	ETIQUETADORA	SERVIDOR
<b>Porta ou IP da Impressora (opcional)</b>	<b>Porta da Impressora de Rede (opcional)</b>	<b>Fabricante (opcional)</b>
127.0.0.1	9100	ARGOX (Etiquetadora)
	<b>Tipo de Comunicação (opcional)</b>	<b>Modelo (opcional)</b>
	Acesso Direto	Não se aplica
<b>Salvar</b>	Salvar este e adicionar outro	

O navegador Chrome bloqueia o CPRINT, então será necessário:

-> Buscar no navegador:

chrome://flags/

-> Procurar no CTRL+F:

Block insecure private network requests

### Block insecure private network requests.

Prevents non-secure contexts from making sub-resource requests to more-private IP addresses. An IP address IP1 is more private than IP2 if 1) IP1 is localhost and IP2 is not, or 2) IP1 is private and IP2 is public. This is a first step towards full enforcement of CORS-RFC1918: <https://wicg.github.io/cors-rfc1918> – Mac, Windows, Linux, Chrome OS, Android

Disabled

### Enable Cross-Origin-Embedder-Policy: credentialless

Credentialless is a Cross-Origin-Embedder-Policy (COEP) variant. COEP:credentialless causes no-cors cross-origin requests not to include credentials (cookies, client certificates, etc...). Similarly to require-corp, it can be used to enable cross-origin-isolation. – Mac, Windows, Linux, Chrome OS, Android
